Scope and Contents of the Collection

The Stuart D. McIntosh papers document the professional life of Stuart D. McIntosh, a software engineer, and founder of ADMINS, Inc., at the Massachusetts Institute of Technology. The papers date from 1955 to 1976 with the bulk of the papers dating from 1967 to 1975. They include memoranda, reports, drafts of working papers, correspondence, articles authored and coauthored by McIntosh, D.L. Parnas and David Griffel, background materials on computer science, data management and processing, as well as research and supplemental materials. The bulk of the papers consist of information about ADMINS, a language and an interactive data management facility meant to ease and speed up data management and processing, and allow an in-depth analysis of data. Numerous reports discuss different aspects of the project in its various stages and manuals explain its usage and applications. There are papers pertaining to courses taught by McIntosh at MIT including Public Sector Fiscal Management and

Model Building. There is also information on symposiums, talks and presentations attended and given by McIntosh.
